EVoline®

We provide perfect connections for your kitchen.

EVoline® Kitchen recipes

The kitchen is the heart of the social life of any home. Nobody spending time here wants to worry about safety.

Carefully designed and individually adapted electrical systems make life much easier. The highly aesthetic EVoline products meet these needs by being both convenient and reliable. Retractable sockets create space and clarity, make good use of dead space and comply with all safety requirements. EVoline kitchen solutions combine elegant, functional design with longevity.

These benefits are appreciated by kitchen manufacturers and professional chefs, who integrate EVoline into their kitchens. EVoline products are modular offering unlimited possibilities for individual configurations. The EVoline configurator supports you selecting the right product for your needs.

All elements are individually tested, documented and certified.

Built-in electrification modules:

Whether they are in a table or worktop, the EVoline solutions create space and clarity as well as being quickly available whenever they are needed.

EVoline®

Kitchen - Electricity - Water - no problem!

EVoline® BackFlip

When closed, the EVoline BackFlip is just a thin plate on the work surface. No water can enter the electrical system. At the touch of a finger it flips 180 degrees and presents its functional elements:

2 sockets and a USB charger lie high enough above the work surface to protect them from water ingress. The low installation depth of just 53 mm means that the module can be mounted above drawers or fixed kitchen appliances.

EVOLine®

Visible on demand.

EVOLine® Port Cuisine

With EVOLine Port Cuisine socket, plugs and cables disappear in the table.

Just the collar and cover of the EVOLine Port are visible on the surface- illuminated on request by using energy-saving LEDs in blue, red, green or white.

A gentle touch of a finger lifts the cover to enable easy pull up of the Port. Equally gentle pressure and the EVOLine Port - complete with plugs - disappears in the aperture. The rocking cover creates enough space for cable exit.

EVoline®

Innovation for smallest spaces.

EVoline® Square80

The EVoline Square80 was specifically designed for a standard 80 mm apertures. The cover, which slides easily to one side, is not just visually pleasing; it can also be equipped with a Qi charging function. This technology allows wireless induction charging for devices that comply with the Qi standard, such as smart phones.

Under the cover one socket for the country of use and a USB charger are standard.

The EVoline Square80 can also be supplied with a CAT 6 socket with cable and plug or a pull out CAT 6 patch cable.

The unit is fastened below the worktop using a quick lock system. (Patent pending)

EVoline®

For corners in kitchen, bars and offices.

EVoline® V-Port

There is nearly always space available under the wall-mounted cupboards of a kitchen – or even inside the cupboards themselves, especially in the corners between walls and cupboard units. This is the perfect location for the EVoline V-Port. The EVoline V-Port is elegantly housed in stainless steel optics. At a touch of a finger the sockets emerge.

The product is also available with an additional USB charger.

EVoline®

At the touch of a finger.

EVoline® FlipTop *Push*

The FlipTop *Push* is an elegant, flush-mounted built-in solution for all worktops that require power and charging sockets for tablets and smart phones.

Easy to clean stainless steel surface.

EVoline®

Kitchen expert.

EVoline® Dock

Ideal for installation under hanging cupboards and on worktops.
All connections handy and close together.
Can be configured as a charging station for smart phones or tablets, also with USB charger if required.

EVoline®

Variable. Combinable. Convenient.

EVoline® R-Dock

The EVoline R-Dock can be installed in any 90-degree corner. Its gently sloping front makes it easy to use.

Available in various versions.

EVoline®

Comfortable.

EVoline® V-Dock

The EVoline V-Dock transforms dead corners in the kitchen into functional spaces. It is variable in length and can be mounted in a horizontal or vertical position. A further benefit: The connection cable is kept out of sight behind the profile. The 45° angle of the EVoline V-Dock makes it easy to connect power or data cables.

Individual modules options available.

EVoline®

At home in the kitchen.

EVoline® T-Dock

A solid stainless steel pillar holds the EVoline T-Dock clear of the table top. This creates more work space and in the kitchen and provides a safety gap between the power supply and potentially moist surfaces. Secure cable routing through the pillar. Fixed from below with screw-nut.

EVoline®

Universal fit.

EVoline® FrameDock

The EVoline FrameDock fits flush on horizontal and vertical surfaces – a kitchen worktop, a wall or the side panel of a piece of furniture. The low installation depth and simple installation from surface side make it easy to fit virtually anywhere. This discreet unit combines high quality design with individual power and data module options.

EVoline®

Multiple award-winning design and function.

EVoline® Plug

The extra-flat EVoline Plug saves space on your work surface and can easily be fitted retrospectively to any electrical appliance.

Its intelligent joint mechanism turns the handle into a lever, which allows releasing the Plug from the socket with minimum effort.

Even if the cable is jerked, the EVoline Plug is released without damage.
